Fenergo AI Governance Overview

fenergo

Audit Readiness | Decision Control | Data Protection | Responsible Innovation

AI Governance Framework

30+ Mapped Requirements
Across the AI Lifecycle

Regulatory Alignment

Governance controls aligned to AI and data regulatory frameworks across key global jurisdictions.

Impact Assessment

AI capabilities are subject to governance and risk assessments that inform oversight, controls, and operational safeguards.

Human Oversight

Workflows can be configured to include human review and varying levels of automation based on client policy and operational requirements.

Explainability

Human readable rationales explain what Agent actions were taken and why.

Observability

Immutable, time-stamped audit logs support traceability and review.

Privacy & Security

Client data is not used for model training, with regional hosting, access controls, and encryption applied to data in transit and at rest.
